IBM Cognos® Analysis for Microsoft Excel brings the benefits, power and familiarity of Excel to the arena of modern enterprise performance management. Cognos Analysis for Microsoft Excel enables business analysts, financial analysts, line-of-business managers and others to explore and analyze data from a variety of different sources—including IBM Cognos TM1 and IBM Cognos Business Intelligence—without IT support.

IBM Cognos Analysis for Microsoft Excel

You provide the data and parameters for each analysis, and the tool uses the appropriate statistical or engineering macro functions to calculate and display the results in an output table. Some tools generate charts in addition to output tables. The data analysis functions can be used on only one worksheet at a time.

60 Excel tips every user should master - TechRepublic

Since the Analysis ToolPak does machine learning with regression and other complex data analysis, I assume Microsoft sees Excel as one of their platforms for Advanced Analytics. Anyhow, the ToolPak feels a bit old-school, as using hard-coded functions in SAS or SPSS. Modern data science is about open libraries and transparency.

For more information, see the Product Availability Matrix (PAM). SAP Analysis for Microsoft Office helps you to gain insight into business data and make intelligent decisions that impact corporate performance. It consists of the three components: Analysis Plug-in, EPM Plug-in and BPC Plug-in.

SAP Analysis for Microsoft Office - SAP Help Portal

A large part of the use of Microsoft Excel was data analysis of different types and levels. As the volume of data increases, more of the data analysis is being done on programming languages such as R and Python. So do consider adding some programming skills if you believe your career could involve data analysis in the future.

Azure Analysis Services uses Azure Active Directory (Azure AD) for identity management and user authentication. Any user creating, managing, or connecting to an Azure Analysis Services server must have a valid user identity in an Azure AD tenant in the same subscription. Azure Analysis Services supports Azure AD B2B collaboration. With B2B, users from outside an organization can be invited as guest users in an Azure AD directory.
