Basic Commutative Algebra: Singh, Balwant: Trade Paperback ...

An A-algebra B is said to be commutative if the ring B is commutative. Let $\phi : A \rightarrow B$ be an A-algebra. Then B becomes an A-module via ϕ , i.e. with scalar multiplication given by $a \cdot b = \phi(a)b$ for $a \in A, b \in B$. Let 1_B denote the multiplicative identity of the ring B, to distinguish it from the multiplicative identity 1 of A.

Singh, Balwant - Basic Commutative Algebra [d47e1d8y67n2]

The main prerequisites are familiarity with groups, rings and fields. Proofs are self-contained.The book will be useful to beginners and experienced researchers alike.

Buy Basic Commutative Algebra Book Online at Low Prices in ...

Let m be the ideal consisting of all nonunits. Since $0 \notin m, 0$ is a nonunit, so $1 \notin m = 0$, and it follows that the ideal m is proper. Now, if b is any proper ideal of A then all elements of b are nonunits, so $b \subseteq m$. Thus all proper ideals are contained in m , so m is the unique maximal ideal of A .
