Business Process Model and Notation is a graphical representation for specifying business processes in a business process model. Originally developed by the Business Process Management Initiative, BPMN has been maintained by the Object Management Group since the two organizations merged in 2005. Version 2.0 of BPMN was released in January 2011, at which point the name was amended to Business Process Model and Notation to reflect the introduction of execution semantics, which were introduced alon

Business Process Model and Notation - Wikipedia

Initial Message Return Message BPMN 2.0, a Message is a graphical object. Message Conditional Escalation Group is a drawing aid that visually links enclosed elements. Documentation is purely an XML element. It has no graphical representation. Group Documentation

BPMN 2.0 Method & Style - BPMessentials.com

BPMN 2.0 is the industry standard diagramming language for business process models. The meaning of the business process diagram is the same, regardless of the tool used to create it. But creating models that are correct, complete, and clear demands more than a dictionary of BPMN shapes and symbols.

BPMN Method and Style, Second Edition, with BPMN

Level 3, or executable BPMN, is brand new in BPMN 2.0. Here the XML underneath the diagram shapes becomes an executable design can be deployed to a process engine to automate the process. The method and style detailed in the book aligns these three levels, facilitating business-IT collaboration throughout the process lifecycle.

BPMN Method and Style: A levels-based methodology for BPM

BPMN 2.0 is the industry standard diagramming language for business process models. The meaning of the shapes and symbols is defined by a specification, independent of the tool employed. But creating models that communicate the process logic clearly and completely demands more than a dictionary of shapes and symbols.

BPMN Quick and Easy Using Method and Style: Process

I'm back on one of my favorite topics: portability of BPMN from one tool to another. BPMN is a standard so portability is a given, right? Wrong. Not even close. In version 1.x, BPMN didn't even provide an xml schema to export to, much less a declaration of how much of it needed to be

Business Process Model and Notation (BPMN) - Version 2

BPMN Process Model - Descriptive, Analytic (Operational) to Executable. It is often said that BPMN 2.0 is becoming too complicated comparing to 1.0 and 1.2, especially for business users and process modelers in general. The comprehensive notation set in BPMN 2.0, in fact, is one of its key benefits in comparison to its predecessors - the ability of the business process models to be executed on the process engines.
