It is also intended to be of assistance to the many carers who find themselves in the position of needing to make decisions on behalf of mentally incapacitated relatives and friends. Each chapter sets out the basis provisions, followed by a series of scenarios dealing with practical concerns which are discussed in the light of the new legislation. □ A practical guide to the provisions of the Mental Capacity Act 2005 □ Easily accessible for those with no legal background □ Includes scenarios illustrating different legal points □ Explores the background to the legislation, including determination of capacity and the definition of best interests Legal Aspects of Mental Capacity is an essential resource for all healthcare and social services professionals, patient services managers and carers working with those who lack the capacity to make their own decisions.

This Companion provides a review of global value chains (GVCs) and the megatrends that are shaping them and will continue to reshape them in deep-set trajectories of change over the next few decades. Megatrends herald both challenges and opportunities. With the growing interest among business leaders and researchers in GVCs, this is a reference work which fills a gap in current literature by focusing on the new features of GVCs, including the shift of global purchasing power towards developing economies, the significance of emerging technologies and data analytics, the increasing tensions between globalisation and de-globalisation, and the role of micro-multinationals, start-up entrepreneurs, the public sector and middle markets in a fast-changing global economy. The early chapters are essentially intradisciplinary in character, with the first seeking to explore some historical aspects of GVCs. Subsequent chapters cover the theory and practice of operations and supply chain management, emerging supply chain technologies, and the impact of inter-firm collaboration across sectors and economies. The final chapters take a more interdisciplinary approach and examine topics at the interface of GVCs with the economy, society,

culture and politics. This comprehensive handbook provides a timely analysis of leading-edge global megatrends and practices in one volume.
