Estimated to range from 1 in 49,000 births to 1 in 189,000 births, with a somewhat higher incidence in Southwest Asia and Africa. Approximately half are stillborn, and an additional one-third die within 24 hours. Most live births are female, with a ratio of 3:1.

Conjoined twins - Wikipedia

Grace and Tippie. Tippie and Grace. Two sisters. Two hearts. Two dreams. Two lives. But one body. Grace and Tippie are conjoined twins, joined at the waist, defying the odds of survival for sixteen years. They share everything, and they are everything to each other. They would never imagine being apart. For them, that would be the real tragedy.

One of Us views conjoined twinning and
other "abnormalities" from the point of
view of people living with such anatomies,
and considers these issues within the larger
historical context of anatomical politics.

Anatomy matters, Alice Domurat Dreger
tells us, because the senses we possess, the
muscles we control, and the resources we
require to keep our bodies alive limit and
guide what we experience in any given
context.

One of Us views conjoined twinning and other 'abnormalities' from the point of view of people living with such anatomies, and considers these issues within the larger historical context of anatomical politics.

This deeply thought-provoking and compassionate work exposes the extent of the social frame upon which we construct the 'normal.'
