Release notes - most of the time non-existent unless you know someone on the inside - at least mototola publishes release notes although some question the content and worth of it. I believe 7.2 firmware and CPS should be published very soon with more bug fixes and enhancements. If I can get release notes I will look to get them up on the forum.

### *New Hytera NA Firmware V7.00.11.01*

Release Notes What's New in This Release 5 economically feasible way to configure the radio remotely. You need to use the XPT OTAP programming software to configure the radio. Remote programming is applicable only to the radio that supports this feature. For detailed description and configuration, refer to Hytera XPT System Application Notes. For more

### *Release Notes - HamDigitaal.nl*

There are a number of new features in the release notes for v8.05 of the Hytera CPS and firmware. I will not cover the trunking features, just the features that apply to amateur radio. Radios Single Frequency Repeat (SFR) SFR is not new in this release, it was originally released for only the PD982.

### *Hytera 8.05 - What's New? - R. Michael Rickey*

Was just looking over the release notes for the upcoming (I don't think it's out yet) Release 8 cps/firmware for Hytera DMR radios. Lots of new features being added (depending on radio platform) including the ability to transmit a radio alias OTA and what looks like their version of RAS. As other people have started to notice, Hytera seems to be stepping up their game.
